

NAME

xzless, lzless – view xz or lzma compressed (text) files

SYNOPSIS

xzless [*file...*]

lzless [*file...*]

DESCRIPTION

xzless is a filter that displays text from compressed files to a terminal. It works on files compressed with **xz**(1) or **lzma**(1). If no *files* are given, **xzless** reads from standard input.

xzless uses **less**(1) to present its output.
